10 January 2022

COVID UPDATE

To All Members of the Caloundra Bridge Club

The Committee wish to inform all Members that there has been a positive Rapid Antigen Test returned by a Member of the Club. This member played in the Saturday afternoon session on the 8th January. The positive test was returned on Monday 10th January.

The QLD Health web site states that a person may be infectious on average for two days before symptoms start. Hence, the member may have been infectious while at the Club.

The Queensland Bridge Association have formally notified the Club that people in a Bridge Club ARE NOT considered to be a Close Contact of any person identified with COVID. Therefore, all protocols that are associated with being a Close Contact of a COVID case do not apply here.

The Committee have taken the following actions :

1. All players who played last Saturday have been contacted and informed of the situation
2. The Monday afternoon session was cancelled until an emergency Committee Meeting was arranged : this took place via Zoom on Monday afternoon
3. The Club was thoroughly cleaned on Sunday (as normal)
4. An extra clean of all surfaces was performed on Monday morning
5. Table cloths have been replaced
6. The board set and cards used on Saturday have been taken out of circulation

We ask all members to closely monitor for COVID symptoms (fever, cough, sore throat, loss of smell, shortness of breath, fatigue, headaches, aches and pain, runny nose and vomiting) and seek medical assistance when necessary.

The Club will remain open for the present.

The Committee remind all members that they MUST NOT attend the Club should they feel at all unwell.

It is the responsibility of all members present at a session to notify the Director of the day if you feel uncomfortable about another member that may appear unwell.

The Committee also remind members that it is their duty to inform the Club as soon as they have a positive COVID test result.

Further updates will be circulated should the current situation change.

Your Committee
